ENVIRONMENTAL POLICY

It is our Policy to work continuously towards protecting, conserving and enhancing all aspects of the environment.

All relevant legislation will be adhered to and we will keep abreast of environmental issues generally and those which are directly relevant to our business in particular.

Our employees will continue to be made aware of the effect of their activities on the environment by means of communication, discussion and training.

We will reduce the environmental impact of our business by the operation of suitable minimisation, recycling and reduction schemes.

We will manage our assets in an environmentally sensitive manner.

We will operate a selective buying policy and where practical use materials, products and services which cause the least possible damage to the environment.

Stephen Barker

Finance Director
